Liburdi Turbine Services provides mechanical and metallurgical engineering services specifically tailored for the gas turbine industry. This allows us to perform an independent analysis of problems and, where required, to modify or redesign components. Our expertise lies in the fields of aerodynamics, thermodynamics, heat transfer, stress analysis, metallurgy and mechanical design as they apply to aircraft and land based gas turbines. The company offers firm opportunities for career growth in an attractive but yet challenging technical environment. We are currently seeking candidates who are qualified for the role of **LPM Worker** on our day shift (Monday to Friday, 7:00am – 3:30pm).

Typical Duties Include (but are not limited to):

- LPM application
- Apply putty and braise
- Tac Welding
- Make Putty
- Apply Stop Off
- Apply Honeycombs to seal segments

Key Skill Requirements:

- Good hand eye coordination and manual dexterity
- High attention to detail
- Willingness and ability to work as part of a team

Key Education/Experience Requirements:

- High School diploma or equivalent is required
- No previous related work experience is required
- Interest in the nuclear or aerospace industry is preferred

Application Information: This role is a full-time position. Interested candidates are encouraged to forward their resume (please include the reference number in the subject line) to: resume@liburdi.com

Liburdi is an equal opportunity employer. We welcome and encourage applications from people with disabilities. Accommodations are available upon request for candidates taking part in all aspects of the selection process.

Only qualified candidates selected for an interview will be contacted.
