Please quote the above Reference Number in the subject line of your email

Liburdi Automation is a leader in design and manufacturing of specialized welding equipment. Serving primarily aerospace and nuclear industries, Liburdi combines expertise in control technology and welding processes to develop unique solutions to challenges presented by these industries.

Our Company has immediate opening for a highly motivated, detail oriented *.NET Developer* to join our team. You will design and develop solutions for our IT initiatives that support the overall growth of the company. We currently have a codebase of old and new custom solutions with plans to further automate our business processes. This position offers the opportunity to gain experience in the full software development life cycle, interact with your customers (fellow employees) and directly make a positive impact in the day-to-day operations of the company. You will be given the responsibility of managing your own projects and the flexibility to solve them as best as you think.

Typical Duties Include (but are not limited to):

- Gathering and Analyzing requirements needed to solve specific business problems.
- Communicate ideas effectively with stakeholders across different business units in both business and technical terminology.
- Design, develop, and document solutions from start to finish, independently or within a team.
- Assist in the maintenance, support, and updating of our existing codebases.
- Research and learn new technology and tools in software development on an ongoing basis.
- Provide input in the overall long-term direction of IT development initiatives.

Key Skill Requirements:

- Excellent results oriented planning, organization and project skills
- Self-starter with an ability to work both independently and as part of a team
- Ability to effectively multi-task
- Ability to prioritize work effectively
- Ability to gather and interpret user requirements
- Ability to build healthy relations with staff and senior level managers across various business units and departments

Key Education / Experience Requirements:

Liburdi Automation Inc.

1230 South Service Road, Stoney Creek, Ontario L8E 5C4 Canada

- Experience with ASP.NET MVC (4,5), Web API 2, ASP.NET CORE 2 (MVC, API), WinForms, C#, VB.NET, VB6, SQL, HTML 5, CSS3, JavaScript, jQuery, Bootstrap 3.x is required
- Experience with Entity Framework 6 and Entity Framework Core 2 is required
- Experience with dependency injection in ASP.NET CORE 2, ASP.NET MVC 5 using Autofac and the repository pattern is required
- Experience with unit testing in ASP.NET Core 2 and ASP.NET MVC 5 using xUnit.net is required
- Experience managing background jobs using Hangfire is required
- Experience with TFVC, including branching and merging using a hybrid development and feature isolation branching strategy is required
- Experience integrating applications with Microsoft Dynamics GP is required
- Experience using SmartConnect to integrate to Microsoft Dynamics GP is required
- Knowledge of a check and approval process for engineering documents, including drawings, procedures and specifications is required
- Knowledge of a requisition process for a midsize enterprise from initial request to receiving the ordered item involving ordering items to a specific engineering project is required
- Knowledge of Microsoft Dynamics GP processes that involve the purchase order, sales order, and receiving of an item is required
- Experience implementing application security based on Active Directory groups following the least privilege principal is required
- Experience subjecting IT requests to risk/opportunity evaluation in collaboration with an IT Team is required
- Knowledge of SharePoint 2003 and 2007 platform is an asset
- Microsoft Certifications is an asset
- University degree or College diploma in a Software focused program
- Recent graduates and experienced developers will be considered
